Our Woods

We work only with solid, natural American hardwoods sustainably harvested from our farm in Illinois. We do not work with veneers, imports, engineered, or treated materials.

Our Finish

Our finish is a proprietary two-step hand-rubbed oil finish. It is a clear, exceedingly durable semi-matte finish that protects the surface from wear and tear while showcasing the natural beauty of the wood.

We offer blackening and satin lacquer finishes on request. We do not offer stains or color-matching services.

How to Buy

Everything we do is custom, handcrafted just for you. Tell us:

- The piece you are interested in
- The style – live edge or conventional edge
- The dimensions: length x width x height
- The wood species

Call or Email for a Quote
